XDS Pro 4 AES/EBU Digital Audio Output

The PRO 4 receiver has a single digital audio port that provides AES/EBU versions of the first two analog audio output ports (Ports A and B). The Port A audio is located on the Pair of CH0 signals while Port B audio is located on the pair of CH1 signals. The following tables contain the interface specifications and connector pin-out of the digital audio port.

Connector	DB-9 Male
Format	Balanced AES/EBU

PIN	FUNCTION
1	CH0_TX+
2	Ground
3	Not Connected
4	Ground
5	CH1_TX+
6	CH0_TX-
7	Not Connected
8	Not Connected
9	CH1_TX-
